CONTENTS

Professor A. Scheludko vii
Stability of dispersions in polar media
A. Kitahara (Tokyo, Japan) 1
Bubble-size distributions in foams
C.G.J. Bisperink (Wageningen, The Netherlands), A.D. Ronteltap (Zoeterwoude, The Netherlands) and A. Prins (Wageningen, The Netherlands) 13
Kerr effect in ternary w/o emulsions
A.M. Cazabat (Paris, France) 33
Monolayer–bilayer equilibrium of phospholipid: Stabilization of neutral lipid droplets in aqueous medium and catabolism of plasma lipoproteins
T. Handa and M. Nakagaki (Kyoto, Japan) 45
Ostwald ripening theory: Applications to fluorocarbon emulsion stability
A.S. Kabalnov and E.D. Shchukin (Moscow, USSR) 69
Development of methods for surface free energy determination using contact angles of liquids on solids
J. Kloubek (Prague, Czechoslovakia) 99
Generalized theory of capillarity for axisymmetric menisci
J. Gaydos and A.W. Neumann (Ontario, Canada) 143
Effect of geometry on steady wetting kinetics and critical velocity of film entrainment
J.G. Petrov, R.V. Sedev and P.G. Petrov (Sofia, Bulgaria) 229
Polydispersity of aggregative systems
A.I. Rusanov (Leningrad, USSR) 271
Influence of cation binding on the electro-optically determined electric moments of purple membranes
S.G. Taneva, I.B. Petkanchin, G. Todorov and S.P. Stoylov (Sofia, Bulgaria) . . 299
Electrosorption of amphiphilic surfactants at the mercury–solution interface and its influence on the stability of thin liquid films
M.K. Kaisheva (Sofia, Bulgaria) 319
Life time of nonthinning liquid films — influence of the surface waves spatial correlations
R. Tsekov and B. Radoev (Sofia, Bulgaria) 353
